

This year:

- 1) We will continue the work in Costa Rica and expand it to Mexico. This project will:
 - a. Plant over 1400 acres of mangrove forest.
 - b. Protect over 13,000 acres of mangrove forest.
 - c. Sequester 3.6MM tons of carbon.
 - d. Protect critical habitat nurseries for a tremendous amount of biodiversity.
 - e. Provide jobs for indigenous women in those areas.

Our goals this year:

- 2) Second project will be to protect 750,000 acres of rainforest in Guyana.
 - a. Containing 60MM tons of carbon and tremendous biodiversity.
 - b. Guyana is one of the greenest counties in the world.
 - c. 85% of is covered in rainforest, of which roughly 20% is occupied by indigenous tribes.
 - d. We will be helping these tribes protect this rainforest:
 - i. Helping them secure their livelihoods by transitioning to a market-based economy through methods which protect the rainforest.
 - e. Five-year, \$3MM needs another \$400,000 to be fully funded.
 - f. Your donation can help ensure that this project is pushed through to completion.

In conclusion:

- Presently we are damaging the environment that we all need to survive at an unsustainable rate.
- While this problem is enormous, we can all do our part.
- I have a dream that our children can live on a planet where humans have learned to embrace our natural environment to create a sustainable future for all living things.
- Your donation will help this dream become a reality.
- Please help me make this dream come true for all of the children in the world.
- Thank you!
